**Secret Star**-Nora Roberts 2020-09-14 The Stars of Mithra trilogy comes to a gripping conclusion in this classic story from #1 New York Times bestselling author Nora Roberts! Lieutenant Seth Buchanan is astonished when the beautiful victim of his homicide investigation turns up—very much alive—at the scene of the murder. Grace Fontaine is keeping secrets, ones that should have killed her, but the notorious heiress refuses to reveal anything. The cool, controlled cop never lets his feelings get in the way of his job, and with a killer at large, Seth can't afford any distractions. But there's something irresistible about Grace...and eventually Seth finds it hard to remember there's any mystery more important to solve than that of Grace herself.

**Mac OS X Panther Killer Tips**-Scott Kelby 2003-12-30 Nothin' but sidebars! The hottest collection of cool tips and hidden secrets for the pro who needs results FAST! Not another newbie book. OS X Killer Tips speaks directly to the daily Mac user who needs to get the most out of their Mac NOW. Other such books tend toward fluffiness, where Killer Tips is all business. Time is money and a lot of experienced users find themselves trying to save time by skimming through larger computer books in order to pull out the useful nuggets of info that are often placed within what we call sidebars (i.e. those Note/Tip/Warning boxes). The Killer Tips series was developed by Scott Kelby because he recognized how useful non-beginning technology users find those cool "I didn't know THAT" sidebars that are peppered all over the other computer books out there. This book is all about speed; showing the Mac professional how to get

more work done faster, while actually increasing quality.

**What A Dragon Should Know**-G.A. Aiken 2009-09-01 "Expect a lot of humor, snarky remarks, and great chemistry" in this fantasy adventure from the New York Times bestselling author of About a Dragon (Under the Covers Book Blog). Only for those I love would I traipse into the merciless Northlands to risk life, limb, and my exquisite beauty. But do they appreciate it? Do they say, "Gwenvael the Handsome, you are the best among us—the most loved of all dragons?" No! For centuries my family has refused to acknowledge my magnificence as well as my innate humility. Yet for them, and because I am so chivalrous, I will brave the worst this land has to offer. So here I stand, waiting to broker an alliance with the one the Northlanders call The Beast. A being so fearful, the greatest warriors will only whisper its name. Yet I,

Gwenvael, will courageously face down this terrifying . . . woman? It turns out the Beast, a.k.a. Dagmar Reinholdt, is a woman—one with steel-gray eyes and a shocking disregard for my good looks. Beneath her plain robes and prim spectacles lies a sensual creature waiting to be unleashed. Who better than a dragon to thaw out that icy demeanor? And who better than a beast to finally tame a mighty dragon's heart? Praise for the Dragon Kin Series "Aiken's patented mix of bloodthirsty action, crazy scenarios and hilarious dialogue have made this series a truly unique pleasure."—RT Book Reviews (4½ Stars) "A chest thumping, mead-hall rocking, enemy slaying brawl of a good book."—All Things Urban Fantasy "Laugh-out-loud funny—I loved it!"—Thea Harrison, New York Times bestselling author

### **Conceptual Design of Chemical Processes-**

James Merrill Douglas 1988 This text explains the concepts behind process design. It uses a case study approach, guiding readers through realistic design problems, and referring back to these cases at the end of each chapter. Throughout, the author uses shortcut techniques that allow engineers to obtain the whole focus for a design in a very short period (generally less than two days).

**A Course in Algebra**-Ernest Borisovich Vinberg 2003 Great book! The author's teaching experience shows in every chapter. --Efim Zelmanov, University of California, San Diego Vinberg has written an algebra book that is excellent, both as a classroom text or for self-study. It is plain that years of teaching abstract algebra have enabled him to say the right thing at the right time. --Irving Kaplansky, MSRI This is a comprehensive text on modern algebra written for advanced undergraduate and basic graduate algebra classes. The book is based on courses taught by the author at the Mechanics and Mathematics Department of Moscow State University and at the Mathematical College of the Independent University of Moscow. The unique feature of the book is that it contains almost no technically difficult proofs. Following his point of view on mathematics, the author tried, whenever possible, to replace calculations and difficult deductions with conceptual proofs and to associate geometric images to algebraic objects. Another important feature is that the book presents most of the topics on several

levels, allowing the student to move smoothly from initial acquaintance to thorough study and deeper understanding of the subject. Presented are basic topics in algebra such as algebraic structures, linear algebra, polynomials, groups, as well as more advanced topics like affine and projective spaces, tensor algebra, Galois theory, Lie groups, associative algebras and their representations. Some applications of linear algebra and group theory to physics are discussed. Written with extreme care and supplied with more than 200 exercises and 70 figures, the book is also an excellent text for independent study.

### **Proofs and Fundamentals**-Ethan D. Bloch

2013-12-01 The aim of this book is to help students write mathematics better. Throughout it are large exercise sets well-integrated with the text and varying appropriately from easy to hard. Basic issues are treated, and attention is given to small issues like not placing a mathematical symbol directly after a punctuation mark. And it provides many examples of what students should think and what they should write and how these two are often not the same.

### **Work Done for Hire**-Joe Haldeman 2014-01-07

Joe Haldeman's "adept plotting, strong pacing, and sense of grim stoicism have won him wide acclaim" (The Washington Post) and numerous honors for such works as *The Forever War*, *The Accidental Time Machine*, and the *Marsbound* trilogy. Now, the multiple Hugo and Nebula award-winning author pits a lone war veteran against a mysterious enemy who is watching his every move—and threatens him with more than death unless he kills for them. Wounded in combat and honorably discharged nine years ago, Jack Daley still suffers nightmares from when he served his country as a sniper, racking up sixteen confirmed kills. Now a struggling author, Jack accepts an offer to write a near-future novel about a serial killer, based on a Hollywood script outline. It's an opportunity to build his writing career, and a future with his girlfriend, Kit Majors. But Jack's other talent is also in demand. A package arrives on his doorstep containing a sniper rifle, complete with silencer and ammunition—and the first installment of a \$100,000 payment to kill a "bad

man." The twisted offer is genuine. The people behind it are dangerous. They prove that they have Jack under surveillance. He can't run. He can't hide. And if he doesn't take the job, Kit will be in the crosshairs instead.

**Black Philosopher, White Academy**-Bruce Kuklick 2011-06-03 At a time when almost all African American college students attended black colleges, philosopher William Fontaine was the only black member of the University of Pennsylvania faculty—and quite possibly the only black member of any faculty in the Ivy League. Little is known about Fontaine, but his predicament was common to African American professionals and intellectuals at a critical time in the history of civil rights and race relations in the United States. *Black Philosopher, White Academy* is at once a biographical sketch of a man caught up in the issues and the dilemmas of race in the middle of the last century; a portrait of a salient aspect of academic life then; and an intellectual history of a period in African American life and letters, the discipline of philosophy, and the American academy. It is also a meditation on the sources available to a practicing historian and, frustratingly, the sources that are not. Bruce Kuklick stays close to the slim packet of evidence left on Fontaine's life and career but also strains against its limitations to extract the largest possible insights into the life of the elusive Fontaine.

**The Working Man's Green Space**-Micheline Nilsen 2014-02-21 With antecedents dating back to the Middle Ages, the community garden is more popular than ever as a means of procuring the freshest food possible and instilling community cohesion. But as Micheline Nilsen shows, the small-garden movement, which gained impetus in the nineteenth century as rural workers crowded into industrial cities, was for a long time primarily a repository of ideas concerning social reform, hygienic improvement, and class mobility. Complementing efforts by worker cooperatives, unions, and social legislation, the provision of small garden plots offered some relief from bleak urban living conditions. Urban planners often thought of such gardens as a way to insert "lungs" into a city. Standing at the intersection of a number of disciplines—including landscape studies, horticulture, and urban history-- *The Working Man's Green Space* focuses on the development

of allotment gardens in European countries in the nearly half-century between the Franco-Prussian War and World War I, when the French Third Republic, the German Empire, and the late Victorian era in England saw the development of unprecedented measures to improve the lot of the "laboring classes." Nilsen shows how community gardening is inscribed within a social contract that differs from country to country, but how there is also an underlying aesthetic and social significance to these gardens that transcends national borders.

**Activating the Desire to Learn**-Bob Sullo 2007-01-15 The research is indisputable: Students are less disruptive and do better academically in schools that cultivate the internal motivation of students. In *Activating the Desire to Learn*, veteran educator Bob Sullo shows how to apply lessons from the research on motivation in the classroom. According to the author, we are all driven to fulfill five essential needs: to connect, to be competent, to make choices, to have fun, and to be safe. Studies show that when these needs are met in schools, good behavior and high achievement tend naturally to ensue. Written as a series of candid dialogues between the author and K-12 students, teachers, counselors, and administrators, *Activating the Desire to Learn* covers everything you need to know to change the dynamics of learning in your classroom or school: \* A comprehensive overview of the research on internal motivation; \* Case studies of strategies for activating internal motivation at the elementary, middle, and high school levels; \* Suggestions on how to assess degrees of student motivation; and *Motivating students is not the issue—the hunger to learn is ever-present. Yet schools continue to insist on the traditional reward-punishment model, to the detriment of student achievement. Clearly it's time for change. This engaging and thought-*

provoking book will help you create a culture of achievement by building on the inherent drive to succeed that students bring to the classroom every day.

**Favorite Birds of Florida**-Dick Schinkel 1995

**Crazy '08**-Cait N. Murphy 2007-03-13 From the perspective of 2007, the unintentional irony of Chance's boast is manifest—these days, the question is when will the Cubs ever win a game they have to have. In October 1908, though, no one would have laughed: The Cubs were, without doubt, baseball's greatest team—the first dynasty of the 20th century. Crazy '08 recounts the 1908 season—the year when Peerless Leader Frank Chance's men went toe to toe to toe with John McGraw and Christy Mathewson's New York Giants and Honus Wagner's Pittsburgh Pirates in the greatest pennant race the National League has ever seen. The American League has its own three-cornered pennant fight, and players like Cy Young, Ty Cobb, Walter Johnson, and the egregiously crooked Hal Chase ensured that the junior circuit had its moments. But it was the National League's—and the Cubs'—year. Crazy '08, however, is not just the exciting story of a great season. It is also about the forces that created modern baseball, and the America that produced it. In 1908, crooked pols run Chicago's First Ward, and gambling magnates control the Yankees. Fans regularly invade the field to do handstands or argue with the umps; others shoot guns from rickety grandstands prone to burning. There are anarchists on the loose and racial killings in the town that made Lincoln. On the flimsiest of pretexts, General Abner Doubleday becomes a symbol of Americanism, and baseball's own anthem, "Take Me Out to the Ballgame," is a hit. Picaresque and dramatic, 1908 is a season in which so many weird and wonderful things happen that it is somehow unsurprising that a hairpiece, a swarm of gnats, a sudden bout of lumbago, and a disaster down in the mines all play a role in its outcome. And sometimes the events are not so wonderful at all. There are several deaths by baseball, and the shadow of corruption creeps closer to the heart of baseball—the honesty of the game itself. Simply put, 1908 is the year that baseball grew up. Oh, and it was the last time the Cubs won the World Series. Destined to be as memorable as the season it documents, Crazy '08 sets a new standard for what a book about baseball can be.

**Women and Politics**-Lynne Ford 2018-05-15

Women and Politics is a comprehensive examination of women's use of politics in pursuit of gender equality. How can demands for gender equality be reconciled with sex differences? Resolving this paradoxical question has proceeded along two paths: the legal equality doctrine, which emphasizes gender neutrality, and the fairness doctrine, which recognizes differences between men and women. The text's clear analysis and presentation of theory and history helps students to think critically about the difficulties faced by women in politics, and about how public policies in education, labour and the economy, and family and fertility, impact gender equality. The fully-revised fourth edition explores new critical perspectives, recent political events, and current challenges to gender equality, including the 2016 presidential election and Hillary Clinton's candidacy, the fight for equal pay and paid leave, and the debate over reproductive rights and campus sexual assault. also includes current scholarship on the intersections of race, class, and gender, and expanded coverage of minority women, women in the military, and conservative women. This text, and its two-path framework, is essential to understanding women's pursuit of equality via the political system.

**Chasing Francis**-Ian Morgan Cron 2013-05-07 What happens when the pastor of a mega church loses his faith? Pastor Chase Falson has lost his faith in God, the Bible, evangelical Christianity, and his super-sized megachurch. When he falls apart, the church elders tell him to go away: as far away as possible. Join Chase on his life-changing journey to Italy where, with a curious group of Franciscan friars, he struggles to resolve his crisis of faith by retracing the footsteps of Francis of Assisi, a saint whose simple way of loving Jesus changed the history of the world. Read this riveting story and then begin your own life-changing journey through the pilgrim's guide included in this powerful novel. Hidden in the past lies the future of the church. When his elders tell him to take some time away from his church, broken pastor Chase Falson crosses the Atlantic to Italy to visit his uncle, a Franciscan priest. There he is introduced to the revolutionary teachings of Saint Francis of Assisi and finds an old, but new way of following Jesus that heals and inspires. Chase Falson's spiritual discontent mirrors the feelings of a growing number of Christians who walk out of church asking, Is this all there is? They are weary of celebrity pastors, empty calorie teaching, and worship services where the emphasis is more on Lights, Camera, Action than on Father, Son, and Holy Spirit while the deepest questions of life remain unaddressed in a meaningful way. Bestselling author Ian Morgan Cron masterfully weaves lessons from the life of Saint Francis into the story of Chase Falson to explore the life of a saint who 800 years ago breathed new life into disillusioned Christians and a Church on the brink of collapse. Chasing Francis is a hopeful

**Cinematic Urbanism**-Nezar AlSayyad 2006 The city and the cinema have become inextricably intertwined over the last century, with the identities of places becoming bound up in their cinematic portrayals. We have seen the landmarks of New York, London and Tokyo turn into iconic symbols of wealth, power, status, style and culture, and for the majority of people the images and sounds of movies form the only experience they will ever have of distant cities. Cinematic Urbanism presents an urban history of modernity and postmodernity through the lens of cinema. AlSayyad traces the dissolution of the boundary between real and reel through time and space via a series of films that represent different modernities. They include: Cinema Paradiso It's a Wonderful Life Metropolis Brazil Blade Runner Annie Hall Taxi Driver Do the Right Thing My Beautiful Laundrette The Truman Show. Alsayyad argues that our understanding of the city cannot be viewed independently of cinematic experience. Films do not only capture the depiction of a society; they influence the way we construct images of the world and, as a result, how we operate within it. We are beginning to blur the distinction between what is real in the everyday, and how we imagine the everyday. Cinematic Urbanism explores this dynamic, bringing together insights from urban and film studies to illuminate current architectural debate. .

**Development Economics: Theory, Empirical Research, and Policy Analysis**-Julie Schaffner 2013-09-27 Development Economics: Theory Empirical Research and Policy Analysis by Julie Schaffner offers a means to think about development and policy in a way that is disciplined by economic theory and informed by empirical research. The main goal of this text is to get readers to think rigorously using tools of economic analysis. This text will help to define development objectives, understand the development process, identify potential barriers to development, design candidate development interventions, and analyze the multidimensional impact of theory, empirical research and policy analysis within the study of economic development.

**Driving with Plato**-Robert Rowland Smith 2011-05-03 Learn to ride a bicycle with Einstein, have your first kiss with Kant, get your first job with Adam Smith, and weather midlife with Dante. Let history's greatest minds illuminate life's turning points. In Breakfast with Socrates, Robert Rowland Smith brought the power of philosophy down to earth by proving, in a very engaging and entertaining way, that human moments meet big ideas on a regular basis. Now Smith offers the natural offspring of that book, expanding the "day in a life" concept to life as a whole in Driving with Plato. Start with being born. For some, like Sartre, you get off to a bad start: You didn't ask to be born, and there's little point to it anyway, as life is meaningless. And yet for Martin Heidegger, if you hadn't been born, you'd have no sense of your own being, and that would be a tragic loss. How about midlife crisis? When Dante wrote The Divine Comedy, he deliberately set his story of spiritual transformation at the halfway point of his life. Nietzsche, too, in his autobiography, spoke of burying his forty-fifth year as he went on to yet higher forms of actualization as a self-styled superman. Drawing on the great philosophers, as well as on literature, art, politics, and psychology, Smith creates the richest possible range of ideas for readers to contemplate, all in a warm, humorous voice that revels both in life's absurdities and in the pure delight of discovery. Grounding abstract ideas in concrete experience, Driving with Plato helps us think more deeply about the key events in our lives even as it provides a philosophical education that everyone can appreciate and enjoy.

### **INTRODUCTION TO TRANSPORT**

**PHENOMENA**-BODH RAJ 2012-01-19 This introductory text discusses the essential concepts of three fundamental transport processes, namely, momentum transfer, heat transfer, and mass transfer. Apart from chemical engineering, transport processes play an increasingly important role today in the fields of biotechnology, nanotechnology and microelectronics. The book covers the basic laws of momentum, heat and mass transfer. All the three transport processes are explained using two approaches—first by flux expressions and second by shell balances. These concepts are applied to formulate the physical problems of momentum, heat and mass transfer. Simple physical processes from the chemical engineering field are selected to understand the mechanism of these transfer operations. Though these problems are solved for unidirectional flow and laminar flow conditions only, turbulent flow conditions are also discussed. Boundary conditions and Prandtl mixing models for turbulent flow conditions are explained as well. The unsteady-state conditions for momentum, heat and mass transfer have also been highlighted with the help of simple cases. Finally, the approach of analogy has also been adopted in the book to understand these three molecular transport processes. Different analogies such as Reynolds, Prandtl, von Kármán and Chilton-Colburn are discussed in detail. This book is designed for the undergraduate students of chemical engineering and covers the syllabi on Transport Phenomena as currently prescribed in most institutes and universities.

### **Ghost Stories from the Raj-Ruskin Bond**

2005-08 Ruskin Bond's readers range from nine to ninety. And if there are such things as ghosts there are probably a few who are reading him in the spirit world. In these stories Ruskin Bond presents a picture of a 'haunted India' as witnessed and described by British writers, officials and travellers during the pre-independence era. Ruskin Bond, resident of Mussoorie, is a well-known writer of fiction and a raconteur par excellence. His Tales and Legends from India, Angry River, Strange Men, Strange Places, The Blue Umbrella, A Long Walk for Bina and Hanuman to the Rescue are also available in Rupa paperback. The Ruskin Bond's Children's Omnibus has been a firm favourite with young readers for several years. Ghost Stories from the Raj, The Rupa Book of Great Animal Stories, The Rupa Book of True Tales of Mystery and Adventure, The Rupa Book of Himalayan Tales

and The Rupa Book of Great Suspense Stories are some of his recent books for Rupa.
