High Performance Multimedia-P.A. Bruck 2008-07-23 The focus of High Performance Multimedia is on the ever expanding European e-content industry. Production, aggregation and distribution of that content are the starting points to any future development towards a flourishing industry sector of the third millennium. Nevertheless, in addition to the diffusion of knowledge throughout the industry, digitalisation has completely changed the structure of the content business through the dissociation of content and media channel. This movement creates problems in the process of the business. Highest technological demands in time and money are limiting the size of e-content enterprises today. In contrast, its distribution is still being dominated by broadcasters and telecom providers that skim the biggest part of the profits. However, possibilities do arise when analyzing the industry of e-content. The European e-content market will be able to play a major role in the future by including all relevant players and their abilities. The challenge during the next years will be to stop the concentration on high-end technology and to create new adequate e-content services providing added value to everyone in Europe.

The Ego Trick-Julian Baggini 2011-03-03 Are you still the person who lived fifteen, ten or five years ago? Fifteen, ten or five minutes ago? Can you plan for your retirement if the you of thirty years hence is in some sense a different person? What and who is the real you? Does it remain constant over time and place, or is it something much more fragmented and fluid? Is it known to you, or are you as much a mystery to yourself as others are to you? With his usual wit, infectious curiosity and bracing scepticism, Julian Baggini sets out to answer these fundamental and

unsettling questions. His fascinating quest draws on the history of philosophy, but also anthropology, sociology, psychology and neurology; he talks to theologians, priests, allegedly reincarnated Lamas, and delves into real-life cases of lost memory, personality disorders and personal transformation; and, candidly and engagingly, he describes his own experiences. After reading The Ego Trick, you will never see yourself in the same way again.

Calculus: Concepts and Methods-Ken Binmore 2002-02-07 The pebbles used in ancient abacuses gave their name to the calculus, which today is a fundamental tool in business, economics, engineering and the sciences. This introductory book takes readers gently from single to multivariate calculus and simple differential and difference equations. Unusually the book offers a wide range of applications in business and economics, as well as more conventional scientific examples. Ideas from univariate calculus and linear algebra are covered as needed, often from a new perspective. They are reinforced in the two-dimensional case, which is studied in detail before generalisation to higher dimensions. Although there are no theorems or formal proofs, this is a serious book in which conceptual issues are explained carefully using numerous geometric devices and a wealth of worked examples, diagrams and exercises. Mathematica has been used to generate many beautiful and accurate, full-colour illustrations to help students visualise complex mathematical objects. This adds to the accessibility of the text, which will appeal to a wide audience among students of mathematics, economics and science.

But inside the Glass house, everything is spinning out of Jen's control. Her marriage to her husband, Ted, is on the brink of collapse; her fifteen-year-old daughter grows more distant each day; and her five-year-old son barely speaks a word. Jen is on the verge of breaking, but nothing could have prepared her for what is to come.... On an evening that was supposed to be like any other, two men force their way into the Glasses' home, but what begins as a common robbery takes an even more terrifying turn. Held hostage in the basement for more than forty-eight hours, Jen and Ted must put aside their differences if they have any hope of survival. They will stop at nothing to keep their family safe—even if it means risking their own lives. from school. Over a dozen potential subs have left her in the past year, but just when Cerise thinks it's impossible—that she'll have to go back to vanilla relationships, or be alone forever—she meets William, who wants to make all her fantasies come true. He turns her home into a geisha's dream apartment, a concert hall with a grand piano (which he uses to play an original composition while wearing a tuxedo), and even rents an abandoned loft for a zombie apocalypse scene—complete with canned goods. But there's something strange about William. Well, a lot of strange things. He must be absurdly rich, since he can afford to provide extravagant costumes and props on a daily basis without having to leave work early. He must be insane, since he puts up with Cerise's over-the-top demands. And most importantly, he doesn't redden when he's spanked, and his skin is as cool as satin sheets. When Cerise discovers she's become dome to the infamous "Chilly Willy," as he's known throughout the BDSM urban lore, she begins to find out there's a whole lot more to her handsome submissive than a creative mind and a hard body. And when it's William, ironically, who starts pressing Cerise to give him the kind of commitment she's never given anyone, it'll take everything she has to work through her issues, confront her past, and learn to be vulnerable.

The Dancing Girls of Lahore-Louise Brown 2009-10-13 The dancing girls of Lahore inhabit the Diamond Market in the shadow of a great mosque. The twenty-first century goes on outside the walls of this ancient quarter but scarcely registers within. Though their trade can be described with accuracy as prostitution, the dancing girls have an illustrious history: Beloved by emperors and nawabs, their sophisticated art encompassed the best of Mughal culture. The modern-day Bollywood aesthetic, with its love of gaudy spectacle, music, and dance, is their distant legacy. But the life of the pampered courtesan is not the one now being lived by Maha and her three girls. What they do is forbidden by Islam, though tolerated; but they are gandi, "unclean," and Maha's daughters, like her, are born into the business and will not leave it. Sociologist Louise Brown spent four years in the most intimate study of the family life of a Lahori dancing girl. With beautiful understatement, she turns a novelist's eye on a true story that beggars the imagination. Maha, a classically trained dancer of exquisite grace, had her virginity sold to a powerful Arab sheikh at the age of twelve; when her own daughter Nena comes of age and Maha cannot bring in the money she once did, she faces a terrible decision as the agents of the sheikh come calling once more.
